SUMMARY

Cybersecurity graduate with hands-on experience in cyber forensics, cybercrime investigation, digital evidence analysis, and threat assessment. Skilled in information security, cryptography, OSINT, log analysis, and forensic investigation techniques. Experienced in analyzing phishing attacks, online fraud, identity theft, and unauthorized access incidents. Strong ability to prepare investigation reports, identify attack vectors, and support cybersecurity awareness initiatives. Seeking entry-level opportunities in Cybersecurity, SOC Analysis, Digital Forensics, and Cybercrime Investigation

EXPERIENCE

Freelance Cyber Forensics & Cyber Crime Investigator

Independent | Remote

Aug 2025 - Present

- Conducted digital forensic investigations for cybercrime incidents including phishing, online fraud, identity theft, and unauthorized access.
- Performed evidence collection, log analysis, email header analysis, and basic malware investigation.
- Utilized forensic and network analysis tools to trace malicious activities and identify attack vectors.
- Prepared concise investigation reports with findings, impact assessment, and mitigation recommendations.
- Collaborated with law enforcement agencies during cybercrime investigations.

EDUCATION

B.Sc. in Cyber Security

Indira College of Commerce & Science | Pune

Apr 2025

CGPA: 7.53

PROJECTS

- **SHLOKEY – Pali–Brahmi Cryptography Tool**
Developed a cryptographic system inspired by ancient scripts, integrating symbolic transposition and phonetic encryption for secure communication.
- **LEO – Logical Enforcement Oracle**
Built an AI-driven virtual assistant for network intrusion detection, enabling real-time threat monitoring and automated response.
- **OG STUDIO – Cyber Awareness Initiative**
Produced short films focused on cybersecurity awareness, digital ethics, and online safety.

SKILLS

- Cyber Forensics & Investigation
- Information Security
- Cryptography
- OSINT (Open-Source Intelligence)
- Threat Analysis
- Digital Evidence Collection
- Log Analysis
- Basic Malware Investigation
- Network Analysis
- Threat Monitoring
- Incident Response
- Vulnerability Assessment
- Cybersecurity Awareness
- Report Writing
- Strategic Thinking
- Problem Solving
